

Software Development Project Milestones
EECS 393
Fall 2018

- 9/10 Each project team reports team members and team leader and submits one-page project proposal
- 10/1 Submit full *software requirements specification*, with *inspection report*
- 10/15 Submit *software design document*, with *inspection report*
- 10/29 Demo ready and scheduled: *first project build/increment's functionality; use of an automated version control system; use of an automated unit testing framework*
- 11/5 Submit *functional test plan* and *test-case descriptions*
- 11/12 Demo ready and scheduled: *functional testing, code coverage measurement, and use of bug tracking system*
- 11/19 Project *presentation* ready (slide presentation & demo)
- 12/7 Submit *final source code, status of known bugs (including omissions), and basic user's manual*

Note: You are responsible for meeting each of these deadlines. There will not necessarily be further announcements about them. Each deliverable should indicate the work breakdown, with who was responsible for each task and what percentage of the work they did. The team leader should review this with each team member before submission. *Every member* should inspect each project deliverable and report issues/problems. The inspection findings of each member should be indicated on the inspection report.
